Shower Valve Cartridge Chart

Find the brand, then how the handle works.

CARTRIDGE	VALVE	HANDLE
Moen 1222	Posi-Temp	Turns only
Moen 1212	M-CORE 2 Series	Turns only
Moen 1225	Standard, Moentrol	Pull out and turn
Moen 1213	M-CORE 3 Series	Pull out and turn
Moen 1224	Two or three handle	One per handle
Delta RP19804	Monitor 1300/1400, to 4/2006	One handle
Delta RP46074	MultiChoice 13/14, after 3/2006	One handle
Delta RP32104	Monitor 1700/1800, to 4/2006 or 3/2007	Volume + temperature
Delta RP47201	MultiChoice 17T, after 3/2016	Volume + temperature
Pfister 974-5299	0X8, JX8, VB8, JV8	One handle
Pfister 974-2920	Avante	Pull and turn

Shut off the water and open the handle to relieve the pressure before taking the trim off.

Set the hot limit stop again after the new cartridge is in. Moen's 1222 sheet marks 120F (48C) max.

Moen diverter: 94543 before 2010, 116719 after.

Delta dates RP19804 and RP32104 04/2006 and earlier in their titles; their features say before March 2006 and before March 2007. For a 2006 or early 2007 valve, the model's parts list names the cartridge.
